AMENDMENT TO THE CLAIMS

1. (Currently Amended) A method for provisioning a telematics unit ~~units~~ comprising the steps of:
initiating a wireless over-the-air service provisioning session between a the telematics unit and a wireless network carrier, wherein data is downloaded from the wireless network carrier to the telematics unit during the over the air service provisioning session; and
upon completion of the over-the-air service provisioning session between the telematics unit and the wireless network carrier, automatically initiating a call from the telematics unit to a telematics service provider, wherein at least a portion of the data downloaded from the wireless network carrier to the telematics unit is uploaded to the telematics service provider.
2. (Original) The method of claim 1, also comprising the steps of:
updating a database at the telematics service provider with the data uploaded from the telematics unit; and
utilizing the updated database to provide telematics services through the telematics unit.
3. (Original) The method of claim 1 further comprising the steps of:
determining whether the over-the-air service provisioning session with the wireless network carrier was successful;
responsive to the determining step, if the over-the-air service provisioning session with the carrier was not successful, initiating a telematics service provider over-the-air service provisioning session, wherein data is downloaded to the telematics unit during the telematics service provider over-the-air service provisioning session.
4. (Original) The method of claim 3, wherein the telematics service provider over the air provisioning service session is initiated by a vehicle ignition cycle.

5. (Original) The method of claim 3, wherein the telematics service provider over the air service provisioning session is initiated based on a number of ignition cycles counted within a predetermined period of time.

6. (New) A system for provisioning a telematics unit, wherein the telematics unit automatically initiates a call to a telematics service provider notifying the telematics service provider of a successful provisioning session with a wireless network carrier and wherein at least some provisioning data from the wireless carrier is transferred from the telematics unit to the telematics service provider.
